

PulseJack® 2xN Gigabit

US Patent #7241181

Description:

10/100/1000 Base-T RJ45 2xN Integrated Connector with Magnetics, designed to support such applications as: Switches, Routers, Servers and Hub.

Features and Benefits:

- Ⓜ RoHS peak wave solder temperature rating 260°C
- Ⓜ Suitable for CAT 3, 5, 6 UTP cable or better
- Ⓜ 350µH minimum OCL with 8mA bias current
- Ⓜ High performance for maximum EMI suppression
- Ⓜ Meets or exceeds IEEE 802.3ab standard for 1000Base-T

Electrical Specifications @ 25°C - Operating Temperature 0°C to +70°C

US Patent #7241181

2xN Gigabit Application Note

These Integrated Connector Modules are specifically designed for the implementation of a 10Base-T, 100Base-TX and 1000Base-TX transmission over data-grade unshielded twisted pair cable (UTP-3, 5-5e and 6).

The connectors category provide excellent EMI filtering and are suitable for Embedded Systems and Multiport Applications. Pulse has worked closely with the leading IC manufacturers in providing these 10/100/1000 solutions, thereby assuring compatibility with each transceiver.

JCO series meet the stringent open circuit inductance requirements imposed by IEEE. When an 8mA DC current is applied across the transformer windings, the transformer will provide at least 350 μ H of open circuit inductance. The transformers used in each module also provide 2250Vdc minimum isolation, wide band width with minimal attenuation and fast rise times to minimize system level jitter.

Notes:

- For maximum EMI suppression (electromagnetic interference) place the decoupling capacitors adjacent to Vcc and 50 Ω connections.
- Connections to ground should be as short as possible.
- Connections between 10/100/1000 IC and the connector should be direct (ideally no change in direction) and of minimum length.
